

AeroTek receives Award of Distinction from PRI/NADCAP

November, 2012 (Whitby, Ontario) – AeroTek is pleased to announce that the Company has achieved Merit Status with PRI for its performance during previous NADCAP audits, in which the Company received only a few minor non-conformances.

“I am very pleased with the performance of our team. We have come a long way over the past few years, with everyone working exceptionally hard to achieve this result. We have been working hard, year on year, to achieve better scores each year by improving our processes and personnel training practices, ensuring consistent quality results. This year’s audit was the best we’ve done so far. I’m very happy for the team. It means that AeroTek is working extremely efficiently now and our performance is truly at a high professional level.” Said CEO/President Jonathan Schofield.

Merit Status is a very difficult distinction to achieve with PRI. It is even more difficult to maintain, as companies must maintain continuous improvement of the audit process with increased expectations of customers. As a result of this achievement, AeroTek is no longer required to undergo audits on an annual basis, but on an extended 18-month audit schedule.

AeroTek Manufacturing Ltd. is a world-class aerospace processing facility strategically located in Whitby, Ontario, along the Toronto-Montreal corridor close to the Hwy401, allowing the Company to provide efficient coating services to the Canadian aerospace industry. The Company specializes in providing traditional as well as environmentally friendly aerospace coatings, including anodizing (hardcoat, sulfuric, light-sulphuric, boric-sulfuric), electroplating (cadmium, silver, gold, copper, nickel), chemical films (passivation, dry film lubricants), aerospace paints and Ion Vapour Deposition of Aluminium.

AeroTek has acquired more than 400 aerospace OEM process approvals including Boeing, Goodrich, SAFRAN, Bombardier, Airbus, Sikorsky, Bell Helicopter, Honeywell, GE, Pratt and Whitney and many more.

The Company has also recently been approved by SAFRAN to perform landing gear maintenance repair and overhaul (MRO) services.

AeroTek is ISO 9001/AS9100 and NADCAP certified.
